

~~SECRET~~
DIRECTOR OF CENTRAL INTELLIGENCE
Intelligence Community Staff
Washington, D.C. 20505

22 July 1988

MEMORANDUM FOR: [redacted] 25X1
Office of Collection Management
National Security Agency

FROM: [redacted] 25X1
Deputy Director, Planning and Policy Office

SUBJECT: Future Signals Environment Working Group Meeting [redacted] 25X1

1. Work on the Future Signals Environment study is in its final stages and I want to give you a sense of the tasks that remain. The Deputy Director of Central Intelligence has approved distribution of the current draft of the study to NFIB members for consideration at an NFIB session in mid-August. The final version of that draft must be ready for reproduction by 29 July to allow adequate time for NFIB member review before the meeting. [redacted] 25X1

2. To ensure that any late textual recommendations receive consideration before we move to reproduction, a final working group session will be held at [redacted] on 27 July at 0900. As we have worked to shape the final draft in the last few weeks, agency representatives have given us some helpful inputs. Working level contact with your representative [redacted] indicates that NSA may have a small number of comments to make in two or three areas (the PRC writeup, the FIS chapter) beyond those already offered. As we will have to close out the text after our session on the 27th, we will need to get those comments in hand that day. We also remain interested in getting any other comments you might have, particularly any that relate to the study's Key Judgments. [redacted] 25X1

3. I appreciate the help you have given throughout this long effort. If you have any questions on these final stages, please call me [redacted] 25X1
